OREGON SCIENTIFIC JW 102

The new multifunctional weather clock **JW 102** from **Oregon Scientific** will tell you all you need to know about the elements on any day.

As well as the current date and time, automatically synchronised in Europe and the UK, the large 13" x 8" LCD display gives loads of useful information: indoor and outdoor temperature (remote sensor included), atmospheric pressure, a weather

forecast for the next 12-24 hours and the moon phase. JW 102 will even warn you if the temperature

outside drops below -3°C! The clock comes with table and wall-mounting stands and ships at €149 – www.oregonscientific.be
